

Photo Wave by Luca Volpe and Alan Wong

One of the most requested effects from the PRO MIND SET is now available as a standalone release!

When the PRO MIND SET was first launched as a full close-up act, we received numerous requests to release the individual routines separately. Following the success of DTC Cards, it is now time for **PHOTO WAVE**-a set featuring sturdy plastic cards designed to last a lifetime.

The Routine

It is a simple and direct miracle. display a selection of various photograph cards and ask an audience member to freely choose one.

Once the photograph has been selected, show that the back of every remaining card has a large printed "X." To prove predicted the choice in advance, ask the spectator to turn over their own card. On the back of their selection is also a large "X," but it is printed in a completely different color!

This is a compact, "in-the-hands" Brainwave effect that requires:

- No sticky stuff
- No rough and smooth

What You Receive

Get everything needed to start performing right away:

- Professional Plastic Cards: Durable quality, supplied in a protective plastic sleeve.
- Video Instructions: A downloadable tutorial featuring various handlings for both stand-up and close-up performances.
