

Real Touch by Hernan Maccagno

No batteries

No wires

Nothing on the spectator's body

You don't need to have contact with the spectator before or after.

You don't add or remove anything.

Feel the touch at the moment and place you want.

You have 3 touches and you use them as you wish.

It can be done surrounded by people and in any type of situation.

It resets in 15 seconds!

You can touch the spectator from the front without them closing their eyes, and they don't see anything... They only feel the touch.

That and many other effects!
