

The Hidden Code by Craig Petty

The Hidden Code

offers a more distinctive reveal that gives your audience something fresh.

The effect is simple, but striking. Set the ad card aside, spread the deck, and let the audience name any card. Turn over the ad card, and the barcode reveals their selection. Scan the QR code, and it reveals the same card again.

The handling requires almost no sleight of hand, so even beginners can learn it in just a few minutes. It comes with an ultra-detailed teaching video by Craig Petty, who breaks down the handling step by step so you can quickly learn how to use the deck and understand every performance detail.

The deck looks as good as it feels. Designed by Shuffleton, it is simple, elegant, and full of mystery. It is printed on TCC's exclusive production line for a smooth, distinctive touch, then hand-processed and strictly quality-controlled to ensure durability and ease of use.

Whether you are a beginner starting with magic or an experienced magician adding luster to your original magic, it is very suitable. It will bring your most precious audience the most special new experience.

Note: All predictions in this product are written in English.

What's Included

- Complete gimmicked deck
- Full video tutorial
