

Fortune Tellers Book of Days by Murphy's Magic & Paul Green

They say you can't judge a book by its cover...

This one dares you to.

The Fortune Teller's Book of Days is not a prop.

It's a relic of fate.. a book that feels as though it has always existed... waiting for this very moment.

Effect:

Your spectator names a card.

Another opens the book to their own birthday.

And there, beside that date, written in ink long before the performance ever began, is the very card they named.

No moves.

No fishing.

No explanation

This isn't a card trick...

It's theater wrapped in impossibility.

A carefully constructed experience that blends story, suspense, and revelation into a moment that feels deeply personal - and utterly impossible. Participation becomes prophecy. Curiosity turns to astonishment.

And when the pages reveal what no one could possibly have known... that's when the magic becomes unforgettable.
