

## **SnapQ by Rodrigo Lima and Luiz Paulo Oliveira**

Ever thought about turning a simple disposable cup into a telekinetic projectile?

In this act of dexterity and impact, I defy the laws of physics using only a lightweight object and the power of thought (or an invisible "shot").

What happens in the show?

Empty Hands: I show my completely clean and free hands before starting.

The Shot: With a quick gesture, the object flies or falls as if it had been hit by a direct hit.

Instant Repetition: The mystery is so great that the audience asks to see it again... and I do! Right away, no hidden tricks.

Final Proof: At the end, I show my empty hands again. The secret disappears into thin air!

Ideal for close-up, stage, video, to take and do wherever and whenever you want, you'll always be ready.
