

Legend of the King by Joker Magic

Legend of the King

is a brand-new, eye-catching card effect where a playing card literally transforms from two dimensions into three. This routine blends classic storytelling magic with modern, highly visual card effects-bringing a tale of power, betrayal, and triumph to life right in your hands.

The Story & Effect:

You begin by freely displaying a deck of cards to your audience. From the box, you remove the cards and introduce a royal family.

In every royal family, two figures matter most: the King-and of course-the Prince (Jack).

But this Prince is impatient. Rather than waiting to inherit the throne, he uses dark magic to make his father, the King, vanish... leaving the card mysteriously blank.

Just when it seems the Prince has succeeded, the story takes a dramatic turn.

The King proves far more powerful than expected. Through sheer will, he breaks the curse, returns to existence-and in a stunning visual moment, reappears in full 3D form on the once-empty card, reclaiming his throne!

This is **Legend of the King**.

Why You'll Love It:

This effect is incredibly visual yet surprisingly easy to perform, making it perfect for magicians of all skill levels. The combination of the King's disappearance and his impossible 3D reappearance creates a layered, unforgettable experience that audiences will be talking about long after the performance ends.

What You Get:

- Premium-quality gimmicks by Joker Magic.

- Durable props designed for repeated performances.
- Everything you need to perform right out of the box.
- Detailed video instructions.
- You will only need your own blue-backed Bicycle deck to perform.
- Bring a legend to life-and let your audience witness magic that steps beyond reality.
