

Vanishing Cane - Plastic - Black

The magician takes the stage with a stylish and sturdy evening cane. In the blink of an eye, the cane vanishes from the performer's hands, replaced by two silks. This effect is a hit in the magic world, thanks to its strong impact on the audience.

Great quality at a great price!

- The cane, made of plastic, is about 100 cm long.
- A trick that has always fascinated both kids and adults.
- The silks shown in the video are not included but can be purchased separately. We recommend silks measuring 30 x 30 cm, or even better, the diamond-shaped ones.
