

Swiss Key by Nicholas Lawrence & Hanson Chien

One Key. Infinite Possibilities!

Inspired by the concept of the Swiss Army Knife, Swiss Key is your new everyday carry... with one extra power: creating miracles anytime, anywhere. A compact gimmick that lives in your pocket, packed with dozens of astonishing effects that are easy to perform and incredibly fun.

Ultra Thin. Incredibly Real.

With a thickness of just 2.1 mm, Swiss Key is one of the thinnest gimmicked keys ever created. Discrete, natural, and virtually indistinguishable from a real key.

Absolute Precision

Machined from a solid block of stainless steel using CNC technology and hand-finished to perfection, it guarantees durability, quality, and unmatched realism.

A Team of Excellence

Created by Nicholas Lawrence and Hanson Chien, and engineered by Calvin Liew (creator of Scotch & Whiskey), Swiss Key sets a new standard: a versatile, self-contained magical EDC always ready to perform.

Easy to learn. No advanced sleight of hand required—just a bit of practice to unlock its full potential.

One key. Dozens of effects. Always with you.

Designed for Bill Penetration... and Much More!

Swiss Key allows you to perform a highly realistic bill penetration using any borrowed currency, including polymer bills. Even better? You can let the spectator restore the bill themselves, right in their hands.

Crispy Tearing Sound. Every detail matters.

What professionals love most about Swiss Key is its attention to detail. Thanks to its clever design, not only does it look completely real, but it also produces a convincing tearing sound when pulling the bill through—making the illusion even more powerful.

EFFECTS INCLUDED:

Bill Penetration – One Key, Every Style

Perform with any borrowed bill—paper or polymer, even signed. Clean penetration with multiple presentation options.

Gravitation – Defy Gravity

Balance the key on the edge of a borrowed bill. An impossible moment with everyday objects.

Signed Coin to Anywhere – An Undetectable Miracle

Vanish a signed coin and make it reappear anywhere. The audience hears the real sound of the coin.

Static on Spectator's Hands – Magic in Their Hands

Place the key and bill in the spectator's hands. Without touching anything, an invisible force causes the bill to move.

Vanishing Key – A Classic Reinvented

The key is wrapped inside the bill, visible and tangible... then vanishes instantly.

Zig-Zag Key – Pocket Illusion

Show a normal key and visually split it in half. Restore it and immediately hand it out for examination.

Key Dissolve – Melt Through Reality

Watch the key slowly melt through the bill. A clean, visual, and unforgettable effect.

One gimmick. Complete routines. Always ready.
