

Sucker Smily Box

This is a deluxe variation of the classic Sucker Die Box, with all the usual sucker features, handsomely crafted in wood to give you a collector's quality prop. Instead of dice here we use the round smile face.

The performer displays an empty double compartment box, with doors in front of the box and round holes at the back. The smile is placed in one compartment and the spectators are asked to remember where it is. The box is tilted and the door of the compartment is opened, and the smile is seen to have vanished. The spectators are not impressed because they have heard and seen the smile slide to the opposite compartment. They asked the magician to open the door to the other compartment. The magician closes the door of the first compartment then again tilts the box (the audience can again hear and see the smile sliding over), then opens the door to the adjacent compartment to show that it is empty.

This activity of sliding smile from one compartment to other is repeated till the audience is howling for doors to both compartments are opened simultaneously. Finally the magician opens both the doors and proves the smile has in fact vanished. Even he passes his hands through the holes to make the vanish more convenient. Then he recovers the smile from somewhere else!

Fun and interactive!

- Made of wood. The box measures 60 cm (W) x 21.5 cm (H) x 3.7 cm (D). The face has a diameter of 17.4 cm.
