

## Time Lapse By Mars Magic

The magician takes out the case of his trusted Bicycle deck and clearly shows it to the audience. He lifts the top flap and... suddenly tears a piece right off! The audience is left puzzled, but a moment later they're speechless: with a magical gesture, the card case completely restores itself.

At that point, the magician removes the deck and begins his card routine.

- A fast, visual effect that makes a perfect opener.
- If desired, at the end both the case and the deck can be examined.
