

## Re-Build by Raul Alegria & Erick White

After making a huge impact at Blackpool and selling out in record time, Re-Build, created by Erik White and Raúl Alegría, is finally available.

A direct, visual effect that's impossible to ignore.

Picture this:

A playing card is signed and then torn into several pieces right in front of the spectator. No cover, no suspicious moves. Every fragment is real, visible, undeniable.

Then, without any apparent movement, in a single instant the card visually restores itself right before their eyes.

No awkward handling. No distractions. Just a truly impossible moment happening in real time.

- Re-Build is designed to create immediate reactions: shock, silence, and disbelief.
- Perfect for close-up, professional performances, and social media.
- A clean ending that leaves no possible explanation.

An exclusive effect, already hard to find.

If you're looking for magic that is visual, direct, and hits instantly, this is your next powerhouse effect.
