

Production & Vanish Box

The magician introduces an elegant and eye-catching magic box, clearly showing it from every side. He opens it completely to prove that it is absolutely empty, then carefully closes it again. A magical gesture... and suddenly a doll, little umbrellas, silk streamers, or any other small object you wish appears!

Perfect for spectacular production effects, this magic box can also be used to make objects vanish: simply place them inside, close it, and reopen it to show the audience that they have disappeared into thin air!

An ideal accessory for adding a surprising, practical, and visually striking stage effect to your performances.

- Made of good-quality cardboard.
- Once assembled, the box measures 6.5 cm on each side and is 31 cm tall.
- Easy to use and folds completely flat for practical, space-saving transport.
- Production items are not included. Only the box is provided.
