

PIC by Mickael Chatelain

You take your deck of cards out of your pocket and invite your spectator to choose one. Let's say the chosen card is the 7. The card is placed prominently on the table, in front of everyone! Offer your spectators a glimpse of the highlight of the show! Everyone is naturally attentive, and for good reason! Then, take a 7 cm long nail out of your pocket! And say: "That's the highlight of the show!" Now, let's get down to business, you say! Take the spectator's card, the 7, in one hand, and the nail in the other... Without any hesitation, you drive the 7 cm nail right through the spectator's card! The nail goes right through! Illusion or not? Show the card front and back to your spectators... there will be no doubt!

Do you really want to see the highlight of the show?

Slowly remove the 7 cm nail that pierces the card, slowly, very slowly... the nail finally falls onto the table. Show the card to your spectators. It's definitely a 7, right? But it's impossible! The card is INTACT! No holes! Nothing at all! Show the card front and back. It's a completely ordinary card!

Highlights:

The illusion is incredible! Just a few centimeters from your spectators, there's nothing to see!

The nail is a real metal nail!

Nothing like the cigarette-through-the-card effect! The method is 100% different!

No flaps, no wires, none of that!

The card is shown extremely close up; it's stunning, believe us!

The method is so simple you'll love it; it was just a stroke of genius!
