

Pen Twister

The magician places a pen on the outstretched fingers of a spectator and covers it with a piece of plastic. The pen is clearly visible. After a moment, he rotates the plastic piece and the center of the pen magically disappears, leaving the spectator's fingers visible, which they can open and close at will! Then, the magician makes the center of the pen reappear. To finish, he slightly twists the plastic left and right and removes it. The center of the pen will be magically twisted upon itself!

Astonishingly magical!

- Super easy trick to perform and very impactful.
- The plastic piece fits comfortably in wallet credit card pockets.
- The disappearing center effect can also be performed with a borrowed pen. For the twisting effect, you'll need to use the provided pen.
