

## Miracle Wine Bottles by TCC Magic

The Miracle Wine Bottles is a classic of stage magic that combines mystery, comedy, and mind-boggling surprises.

You present a bottle and a glass placed under two separate covers. In a seemingly impossible display, the bottle and glass repeatedly switch places, defying logic at every turn. The magician lifts the covers again and again, revealing the bottle and glass in different positions, sometimes even multiplying in number!

The routine escalates with unexpected twists, as more and more bottles magically appear uncontrollably, culminating in the entire table being filled with bottles.

The bottles are crafted from ultra-thin aluminum alloy and feature a glossy glass-like electroplated finish, making them nearly indistinguishable from real wine bottles. They're designed for durability, stage visibility, and maximum visual impact.

The largest bottle measures 82mm in diameter and 334mm in height, matching real wine bottles for an authentic stage presence. Minimal size differences ( $\pm 2$ -3mm in diameter,  $\pm 5$ -7mm in height) ensure that the bottles look consistent and authentic on stage during your performance.

The innermost bottle is designed to hold liquid, allowing you to pour an actual drink as part of your final reveal. Take your finale to the next level and leave your audiences stunned. [Note: Wine glasses are not included].

Miracle Wine Bottles has been well-received globally.
