

Little Wonder Rope

A piece of rope is shown, and stretched out between the magician's hands. The rope falls down as you would expect. Yet whenever you wish you can make this rope stand erect in a horizontal or vertical position!

- Easy to do, no skill required.
- Loved by young and old. A brief but effective presentation is described in the instructions.
- The item comes in nice colorful packaging. Supplied is also a similar regular rope that can be secretly exchanged and handed out for examination.

NOTE: The effect may seem similar to the classic "Stiff Rope", but the mechanism is totally different. This rope in fact can remain stiff both horizontally and vertically.
