The Cups and Balls routine is a classic and signature effect amongst all magic effects. It has spawned many different versions and handlings throughout the history of Magic, but its core method and concept have never changed.

The routine includes many types of magic effects, such as Vanishes, Productions, Transpositions, and even Transformations. The entire routine is presented on the desktop, making it look extremely elegant. To a certain extent, elegance should be an idiosyncrasy all magicians should adopt.

Most professional magicians have their own version of the Cups and Balls routine

and deeply believe that it is the path to becoming a true magician (Michael Ammar's Cups and Balls is genius). Each magician tries to add different seasonings to the routine to create their uniquely tasting dish.

Studying the Cups and Balls routine can help you understand magic better as a whole.

The minimalist form of the Cups and Balls is a single Cup and Ball, and the sharpest weapon available in the single Cups and Ball armory is the Chop Cup (the inventor of the Chop Cup is Al Wheatley, here's a tribute).

The core point of the Chop Cup is that it is effortless to get started. At the same time, it does not diminish the magic; rather, some believe it is even more magical, making it a great choice if you do not have much time to practice.

That is why we are here today. Enter the TCC leather Chop Cup.

The set includes 2 Mini leather baseballs (1 regular, 1 gimmicked) and basic routine instructions (the trailer routine is not included).
