

Glitch by Stefanus Alexander

Show a Bicycle card case. You cover it partially with a single playing card and... in a flash, the case vanishes, leaving a stack of banknotes in its place!

But the effect can change every time:

cover the case with a card and, just a moment later, the case has mysteriously disappeared... and in its place appears the full deck of cards, ready to be used in your next routine.

Or again: the Bicycle case is covered for just an instant and instantly dissolves, revealing a card case from another brand. A clean, impossible and totally unexpected change.

An effect that is easy, super visual and immediate — perfect as an opener!
