

Gemini Watch by TCC

A Refined and Elegant Way to Predict "The Moment." Time has always been an eternal theme in artistic creation. For magicians, exploring the elements of time is a pursuit that never ends.

Created by Chen Yang, the creator of TCC's annual best-selling product "Grandma's Miracle", the Gemini Watch is the result of his deep reflection on time-based mentalism.

The Gemini Watch was independently conceived by Chen Yang. We have since been in contact with, and this version has been approved by Collector's Workshop.

Imagine a pocket watch ticking normally. You hand it to a spectator, who turns the knob to adjust the time to any position they desire. You never touch it. You never look.

When they finally stop, the time on the dial perfectly matches your prediction.

No Remote Needed: The entire performance happens right in front of the audience, self-contained within the watch.

Zero Learning Curve: With no "operational threshold," you can master the secret and perform it almost immediately.

A Perfect Force: Use it to force any specific time for mind-reading, hypnosis, or prediction routines.

Dual Purpose: It is a high-quality, functioning pocket watch. When you aren't performing, it serves as an elegant timepiece for daily carry.

Materials: High-quality zinc alloy case with premium silver electroplating.

Interior: Equipped with a precision quartz movement for accurate daily timekeeping.

Aesthetic: Simple, textured, and elegant. It is designed to be a "sharp tool" for the professional mentalist while remaining an ornamental work of art.

What's Included

Pocket Watch (with chain) ×1

Clip ×1

Note: The watch uses a standard LR626 Button Cell Battery.
