

## Telekinetic Playing card

The magician pulls a card from the deck and shows it to the audience. Then he borrows a cigarette and places it on the face of the card. After a moment of concentration and suspense, the cigarette magically rises, standing up on the card. Finally, it returns to its original position and is immediately handed back to the spectator.

An easy-to-perform magic effect with a strong visual impact!

- The deck of cards is regular and not included.
- Compact and practical, you can carry it with you at all times to amaze people whenever you like.
- It can also be used with a small pencil, piece of chewing gum (such as Brooklyn) or other suitable small objects. Let your imagination run free and create new, original presentations every time.
