Discover CASH-OUT, the brand-new effect by Marco Markiewicz.

Transform a simple banknote into the spectator's signed card... right before their eyes!

A card is freely selected, signed, then lost in the deck. You then take a bill from your wallet, slowly fold it... and it visibly transforms into a playing card. You turn it over: it's exactly the spectator's signed card.

A visual, direct, and ultra-impactful effect.
