

## Bicycle Tiger

Like fashion, something is beautiful until everyone has it—then it's forgotten. Many years later, those who revive it are considered cool, because the way to stand out is to have something that breaks the mold and subverts the standards.

The Black Tigers break the mold. A black deck of cards in a sea of white.

Barely contained by a brand-new yet nostalgic tuck case lies a fierce and formidable design. Familiar in its Rider-back bones, but unique in its striking monochrome colors.

Its aesthetic is timeless, but its stock is the stock of the future. Crushed, thin, and durable.

No deck has ever made an impact like this before. This is the deck that started it all.

The first print run of these special edition Tiger decks sold out completely in 96 hours. Now, over 20 years later, Ellusionist is still a leader in the industry.

This Revival Edition takes the torch from its predecessors and will carry it for years to come.
