

ACES by Mickael Chatelain

What is ACES?

It's a professional quality gimmick and specially made to allow you to perform no less than 6 close-up routines but there is no doubt that you will find other ideas!

Made for professional and intensive use ACES will definitely find a place of choice in your close-up!

In your hands, in front of your spectators, a card seems to gradually change into another card, there is no flap, no thread, and above all no manipulation.

ACES doesn't stop there!

Imagine your own effects once you have the gimmick in hand.

In the explanation video, Mickael explains no less than 6 effects that can be achieved immediately with the ACESgimmick.

Better than a long description, click on the link below to watch the video demonstration and tell yourself that you too will do it in just a few minutes!
