

EDC Squared XL (Pocket Fold) by Mark Traversoni

Now in 2 XL A4 Sizes - 210 x 297mm - 8.27 x 11.69 inches

The A4 XL Single Fold folds in half to A5 size approx 148 Å— 210mm or approx' 5.8Å—8.3 inches.

The A4 Pocket Fold version folds to approx' 75 x 210mm or approx' 3 x 8.2 inches making it perfect to slot inside your jacket pocket.

Both sizes make a nice display or giveaway size, just select which of the 2 A4 Versions you prefer.

The Magic Square is a CLASSIC of magic and now you can perform the amazing EDC Squared in the new XL A4 format making it visible for larger audiences, with no memory work or complex maths.

The outstanding feature of EDC Squared is you are able to instantly repeat the effect with the same audience up to 6 times and the grids will all look different. Those that know the Magic Square will know the grid is always the same bar 4 numbers if you only have one solution at hand, with EDC Squared you have 6 cribbed in plain sight that are very easy to read.

These beautifully designed '**Astrology Cards**' do all the hard work for you.

New or existing fans of the Magic Square can use these classy cards in their routines with or without using the crib that's hidden in plain site.

You get 20 in a pack.

Fill them in, blow their minds and give them away as incredibly powerful souvenirs they'll keep forever. Or, wipe them clean (both dry erase and sharpie ink come off) and reuse them for repeat performances.

What is the Magic Square?

-The Magic Square is the effect that makes you feel like Albert Einstein. If you've

never performed it before then you are missing out. It is a truly mind blowing mathematical phenomenon yet you don't even need to be good at adding up - your audience can add up the numbers for you.

-Your spectator thinks of a 2 digit number

-You take out a 4 x 4 grid and based on your intuition start filling in the boxes with a load of seemingly random numbers

-In what feels like the stars coming together, all the rows of numbers in every single combination: vertical, horizontal and diagonal (in fact any symmetrical combination) add up to your spectator's number

EDC Squared:

- **Receive 20 x Magic Square Cards in the version you select, single or pocket fold**
- **Easy to learn**
- **No memory work**
- **Simple crib to 6 different magic square layouts hidden in plain sight on grid**
