

The Void by Javier Fuenmayor and Lloyd Barnes

Nothing new comes from mystery boxes. Most trap you into one ending. It's one card, leading to one reveal, leading to one moment.

Enter The Void:

A seemingly ordinary photo keychain that is secretly your most powerful EDC.

Imagine...

Your RED-BACKED "Lucky" card sits inside a completely ORDINARY PHOTO KEYCHAIN before the trick even begins.

It's in full view the whole time, and your spectators can even hold it themselves.

From a BLUE-BACKED deck ANY card is selected and signed. And you then perform any trick you want. (like your trusty 67 phase ambitious card routine)

Then later:

Your spectator takes the card out THEMSELVES from the Keychain...

And IMPOSSIBLY, your RED-BACKED "Lucky" card it's NOW their signed card!

****** Side Note: And Yes, they could also fold and place the card into the keychain themselves. Yes. It still would work.**

Now imagine something even more personal. Any Photo or any Design YOU choose can sit inside the frame and will BECOME THEIR SIGNED CARD!

****** Side Note #2 : You might be thinking this sounds like a great souvenir and would be perfect for Trade Shows - And you'd be absolutely right!**

The Void is a heavy-duty GunMetal„ç crystal-clear frame that let's the spectator see 100% of what's inside - leaving "nothing" to the imagination.

You can use ANY deck, or ANY Back Design. In fact, The Void is so UNIVERSAL you can use it with:

- Playing cards
- Bills of ALL Currencies (even plastic ones)
- Billets
- Predictions
- Receipts
- Business Cards
- Post it notes
- We can keep going...

Let's just say ANYTHING inside the frame can be secretly switched in, be invisibly switched out, and can stealthily become ANYTHING you want!

And THIS is just the tip of the iceberg.

Enter The Extra Visual Module:

The custom-engineered appropriately named Extra Visual Module allows you to perform "custom-modular-extra-visual-never-before-seen-impossible-looking-thingsÂ©":

- Appearances
- Vanishes
- Transformations
- Transpositions
- Replifications
- Enlargifications
- Shrinkifications
- Teleport-ifications?

But it's not just one-off ultra-visual moments of eye candy, **The Void** can even perform multi-phase routines:

- Have a signed coin completely vanish. And impossibly it appears trapped inside a napkin that's inside The Void that's locked by rubber bands. Like trick photography, you then instantly make their signed coin TELEPORT back inside the frame. (*Extra Visual Points for some flash paper action*)
- Perform the most visual and portable Miser's dream routine. Where you can SEE and HEAR the coins visually appear one at time, one after the other.

- But what if you want to use objects larger than The Void? We teach how to "carry" your Rubik's cubes, sharpies, lighters, 8 balls, etc. "inside" The Void and visually produce it so you can go straight into your favorite routines. Yes, we even show you how to "shove" it back inside.
