

Mental Tape Board by Evgeny Gorlanov

Mental Tape Board

is a powerful and versatile prediction system for modern mentalists and magicians in a compact format that you can always carry with you.

Outwardly, it looks like an ordinary drawing board, but it conceals a mechanism that allows you to create incredible predictions.

Effect:

A spectator freely names a name, word, or number. The board, with black tape attached to its back, remains in full view. When the tape is removed, the prediction exactly matches what the spectator named.

Mental Tape Board is a board inspired by the concept of the Master Prediction System, stripping away everything unnecessary and leaving only the essentials:

- The prediction is visible from the very beginning
- No assistants required
- No electronics
- No complicated setup
- A huge number of performance variations
- Compact and lightweight prop, easy to carry
- Suitable for both stage and close-up magic
- Fully self-contained system

Alternative version with an envelope:

Depending on your presentation, instead of tape you can use an envelope attached to the back of the board, containing the prediction. You can also combine predictions: one written on the board behind the envelope, and another on a piece of paper inside the envelope.

Board size: 24.5 cm Å— 18.5 cm
