

Alcatraz by Etienne Pradier

Alcatraz

(previously sold as "Resto") is a clever gimmick that allows you to reseal a bottle right before your spectator's eyes.

If you perform "card in bottle" effect, you'll show a bottle with their signed card inside, and with the **Alcatraz** gimmick, you'll "pretend" to open it. In fact, by pushing down the gimmick (as shown in the photo), you'll reseal the bottle with what looks like a manufacturer's seal. In just a second, the bottle is locked again. This leaves you able to present it as a sealed souvenir, card inside, leaving a lasting impression!
