

## Ultimate Travelers by Sway Liu and JT Magic (Red)

The Travelers plot has long been considered one of the strongest effects in card magic.

Four signed cards vanish from the deck one by one and travel invisibly into the magician's four pockets. Compared to a standard card-to-pocket routine, the effect feels bigger, more impossible, and more memorable.

However, traditional versions are often technically demanding and difficult to perform naturally in real-world situations.

Now, Sway Liu presents **Ultimate Travelers** - a modern approach designed to make this classic plot cleaner, more direct, and far more practical for real-world performance.

The routine focuses on clarity from beginning to end. It is structured to appear effortless and impossible, while significantly reducing the technical demands normally associated with Travelers. The result is a version that feels powerful to audiences, yet comfortable and reliable for performers.

The method is clever, streamlined, and designed for practical use. With reasonable practice, most magicians will be able to perform this routine confidently.

Despite packing extremely small, the effect plays remarkably big, making it suitable for close-up, walk-around, parlor, formal shows, and even stage performances.
