

Mini Atlas Book Test

What if a book test looked so natural that nobody would ever suspect it?

Introducing **MINI Atlas Book Test** - a pocket-sized atlas featuring the 31 most populous countries in the world, designed to look and feel like a completely ordinary educational booklet.

- No strange pages.
- No suspicious layout.
- No "magic prop" appearance.
- Just a real-looking Mini Atlas...
- Capable of impossible mind reading.

THE EFFECT

A spectator merely thinks of any country flag inside the atlas. They freely explore different information sections: Culture Monuments Resources Population Wealth Without fishing or any obvious process, you reveal the exact country they are thinking of in a manner of intuitive reading. But that's only the beginning.

The participant now focuses on a long word hidden within the Notes section... And you reveal that too. A double revelation from a completely innocent-looking book.

THE METHOD

MINI Atlas combines: A built-in anagram system. An optional memorization approach for advanced performers.

A cleverly hidden crib system

The result? Near-zero memory work with professional-level impact.

Everything is structured to feel natural, direct, and impossible.

WHAT YOU RECEIVE

Pocket-sized MINI Atlas Book Test -31-country custom Atlas booklet

Utility envelope with hidden master crib system

Tutorial access card

Full performance and handling instructions
