

Neatest Decks (Stepped 6-Deck) 2-Pack by GL Design & Bacon Magic

Co-produced by GL Design and Bacon Magic, the **Neatest Decks** is a minimalist storage solution engineered for magicians and collectors. 3D-printed with premium PETG material, each unit has been rigorously tested to ensure maximum durability and everyday practicality.

Intuitive & Versatile Storage The tiered slot design is precision-calibrated for standard Bicycle-sized decks, providing a clear overview and instant access to your collection. Unlike traditional racks with rigid orientations, this system offers complete versatility-store your decks horizontally or vertically to fit your space or highlight specific gaff deck labels.

Configurations & Expandability

Flat Series (6 Decks): Ideal for drawer integration, offering a compact and stable organization solution.

Stepped Series (6 or 12 Decks): Maximizes vertical depth, ensuring every deck remains fully visible and accessible.

Modular Design: Seamlessly combine and expand multiple units to grow alongside your collection, whether for daily practice or professional display.

Effortless Maintenance & Portability: Designed to avoid the bulk and warping issues of traditional wooden racks, these units are lightweight, exceptionally stable, and easy to reposition. The premium PETG material is fully water-washable and dust-resistant for effortless cleaning.

Please Note: Due to the inherent characteristics of 3D printing, minor surface variations or micro-stringing may occasionally occur. These are standard cosmetic traits of the manufacturing process, do not affect structural integrity or performance, and can be easily removed by hand.
