

WOW Post-it by Craziest

Imagine carrying a tiny Post-it pad that can visually transform your drawings into reality. With **WOW POST-IT**, you can sketch anything you want directly onto a sticky note... and then watch it morph into something completely different in full view.

Draw a simple \$1 bill with a Sharpie. Slowly, visually, the hand-drawn illustration changes into a real dollar bill. No cover. No tearing. Just an impossible visual transformation happening inches away from the spectator's eyes.

And the best part? Everything is completely examinable. The Post-it can be handed out immediately, turning a surreal visual moment into a physical souvenir your audience can keep forever.

Organic, modern, and endlessly customizable. Draw objects, predictions, logos, symbols, messages, or money. Your imagination becomes the method.

What's included:

- Tutorial card
- Gimmick ready to go
- Normal Post-it pad
