

Anything Thru Mirror by TCC

Use the mirror as the medium to unlock the infinite splendor of magic.

The core of this effect lies in its cognitive-subversive impact: scarves, Sharpies, chopsticks, straws, and even your own fingertips pass calmly and impossibly through a solid mirror surface. At the end, the mirror is displayed clearly from both the front and back: a solid, seamless sheet without a single hole or flaw.

The original work of Chinese magician Dingding, this exclusive structural design shatters traditional limitations. Every "pass-through" is designed to be purely shocking, touching the audience's sense of wonder directly.

Crafted from premium North American Black Walnut, the frame features a delicate grain and a deep, sophisticated hue. Each piece is meticulously hand-polished to a smooth finish. It is more than a magic prop; it is a highly ornamental work of art with an inherent classic elegance that enhances any collection.

Despite its profound impact, the mechanism is elegant and effortless to operate. By abandoning complex mechanisms and cumbersome techniques, we have created a piece that is as much a joy to perform as it is to display.

FEATURES

- Selected North American Black Walnut for a classic, elegant aesthetic.
- A unique structural design that is as engaging to use as it is to watch.
- Perfectly suited for display in a cabinet or on a desk as a piece of fine art.
- A beautiful, clean design that conceals its secret in plain sight.
