

Ultra Lite Case by JT Magic

Not every magic problem happens on stage.

Sometimes the real challenge is everything between the tricks.

Commercial shows. Walk-around gigs. Lectures. Close-up performances.

Magicians constantly carry large amounts of props, and most cases become heavy, messy, and inefficient very quickly.

And during performance, poor prop management creates the worst feeling of all:

searching, reorganizing, and fumbling while trying to move smoothly from one routine to the next.

JT Magic understands this problem deeply.

That's why we created **Ultra Lite Case**.

A lightweight, highly organized performance case designed specifically for working magicians.

Lightweight by Design

Ultra Lite Case was built to reduce unnecessary burden.

Compact in size, practical in capacity, and extremely light to carry, it's designed for performers who move constantly between shows, tables, lecture rooms, and venues.

A Practical Organization System

The heart of **Ultra Lite Case** is its internal divider system.

Inside the case are:

- 8 dedicated playing card slots
- 4 additional compartments in different sizes

- Adjustable layouts to match your personal setup

The card section allows you to organize up to 8 decks horizontally, fully compatible with labeling systems, so every deck can be identified instantly.

The additional compartments are perfect for cups and balls, ropes, sponge balls, markers, gimmicks, and everyday performance essentials.

Everything stays clean, visible, and easy to access.

No digging through clutter.

No wasted motion during performance.

Built for Real Performance Conditions

The lock opens quickly and smoothly, reducing friction during live performance.

Once opened, the lid stands upright at a 90-degree angle, making access natural and practical while working.

Whether performing, resetting, teaching, or packing after a show, Ultra Lite Case helps keep everything under control.

Features

- Extremely lightweight
- Clear and detailed prop organization
- 8 dedicated card storage slots
- Adjustable internal layout
- Fast access opening system
- Perfect for walk-around, shows, and lectures
- Makes setup and cleanup fast and effortless
