

## Ribbon Thru Jumbo Card

Display an elegant wooden frame to the audience, featuring four holes and a square opening in the center. Thanks to the two side supports, the frame remains clearly visible throughout the performance. Place a jumbo card inside: the audience will be able to see it clearly through all four holes for the entire duration of the effect.

At this point, take a ribbon needle and pass it through the square opening in the center: it will go in from one side and come out the other, while the card remains visible at all times through the side holes. Finally, open the frame and remove the card: incredibly, it will show no holes and no tears. It will be completely unharmed!

An intriguing, astonishing, and highly visual magic effect, ideal for amazing any type of audience.

- Perfect for stage and parlor magic performances.
- Supplied complete with everything you need: frame, jumbo card, supports, and ribbon needle.
- Carefully crafted from fine Teak wood. The frame measures 20.5 cm (w) x 14.7 cm (h) x 2 cm (d).
