

Ribbon Mystery Tube

Show a wooden tube that can be bent in half. A ribbon runs through the tube, and everyone can see both ends of the ribbon. Bend the tube, cut the ribbon right in the middle, and then open the tube again. To everyone's great surprise, the ribbon is still whole!

This trick is very easy to perform and has a stunning effect.

- Finely crafted from premium teak wood. The tube measures 20.5 cm in length, and the sides measure 4.2 x 3.5 cm.
