

larvel Remote Pro

With this remote control, you can control the time on larvel products such as Frozen in Time, the larvel Watch, the larvel Pocket Watch, Big Ben, and the Mystery Box.

The remote control can be programmed/paired with up to six different devices. You can then choose which devices you want to control, one at a time, or multiple, depending on your preference.

Thanks to the tactile buttons, arranged like a phone or calculator, it's easy to enter a time without having to look at what you're doing.

You'll receive the USB-rechargeable remote control complete with online video instructions.
