

## Morph (Blue) by Marco Markiewicz

Introducing **MORPH** by Marco Markiewicz

A visual, playful, and impossible effect that will amaze both children and adults.

You remove an ordinary Tic Tac box and place it openly on the table.

Next, you introduce a deck of cards, which the spectator may freely shuffle. A card is selected, for example, the 6 of Clubs.

Before revealing the chosen card, you pour a few Tic Tacs into the spectator's hand. When they open their hand and count them, an incredible coincidence is revealed: There are exactly 6 Tic Tacs. Exactly matching the value of their selected card.

The audience believes they have just witnessed the revelation.

But that was only the beginning.

You pick up the Tic Tac box again, place it flat on the table, and simply wave the selected card over it.

Right before the spectators' eyes, the logo on the Tic Tac box visually transforms....into the spectator's chosen card!

To finish, you immediately hand the Tic Tac box out for examination. The spectators can inspect everything-they will find absolutely nothing.

### Features

- Uses a genuine Tic Tac box
- Powerful double climax
- Impossible visual transformation
- Easy to perform
- Perfect for close-up and social media
- Fully examinable at the end

### Includes

- Special gimmick

- Detailed instructional video
