

Instant Wheels by JC Magic & MS Magic

Introducing our all-new magic effect - **Instant Wheels**.

The performance starts with a drawing app on your smartphone. The magician simply draws a car on the screen. Suddenly, the sketched car moves and drives forward on the phone display. Right after that, the drawn car magically transforms into a real white physical car coming out from the phone.

Then, just tap the real white car with your phone once more, and it instantly turns into a proper toy car.

This trick is easy to perform and highly visual with stunning visual effects. The required app is included and works perfectly on both iOS and Android devices.
