

## **Red & White Beyond the Secret -Ethan Yip's Color Changing Silk Routine**

This is probably the cleanest and most convenient color-changing silk routine you'll ever see.

The Color Changing Silk Routine is a classic sucker trick routine. Loved by magicians, it works for stage, parlor, and even close-up performances-so there are countless different versions of its routine.

Ethan Yip fell for the Color Changing Silk Routine early in his magic journey-after seeing renowned American comedy magician Levent's version. He studied other magicians' takes, blending their strengths to keep it fun and clean.

There are no unnecessary fillers like picking up a magic wand or magic powder during the routine. The set includes a secret topit system that not only handles the dye tube invisibly within this routine but also allows you to cleanly vanish coins, balls, and other objects - one method with multiple uses

The dye tube used in it features a marking system-so even when you keep it in your pocket, you can quickly find the correct orientation right there.

This set includes everything needed for the routine-you just need to have a tailor handle it or do a simple modification yourself, and then you can start learning the routine.

The instructional video is personally filmed by Ethan Yip, covering the full working, complete script, and detailed handling.
