

Gunslingers Poker (Blue) - Pokerdeck

Joker and the Thief presents **Gunslingers Playing Cards** - a luxury poker deck inspired by the outlaws, legends, and ghosts of the Wild West frontier.

In the unforgiving frontier, whispers drift through saloons of two gunfighters who defy death itself: The Joker and The Thief. No one's seen their faces and lived to tell the tale. All they leave behind is a single Ace of Spades - the card of death. Now these immortal tricksters have returned as renegades of the plains, riding through saloons, stage coaches, and bank vaults, their calling card resting in the dust beside those who just weren't fast enough.

Every court card has been hand illustrated, each one a character drawn from the dust and gunsmoke of the frontier - soldiers, desperadoes, drifters, and the steadfast leaders of a land long since corrupted. The pips, suits, and tuck case carry the rugged texture and rich color palette of the Old West, marrying tradition with a darker, mythic edge.

Available in two editions, each with its own personality:

The Standard Edition is bold and refined, featuring deep red and green inks across the cards, with a tuck case finished in subtle orange metallic ink and heavy embossing on the design elements. A deck built for everyday play that still earns its place on display.

The Outlaw Edition is the legend itself. The tuck case is finished with hot stamped foil, while the cards feature metallic ink that catches the sunlight with every shuffle - a shimmer worthy of the gunslingers it honors.

For collectors who crave something truly extraordinary, both editions are also offered in a Gilded Edition, strictly limited to 52 numbered and sealed decks - as unique and finite as the suit itself.
