

Locker by Tora Magic - Bühnentrick

Hand a puzzle cube to a spectator and let them mix it up as much as they want. Take the cube back, place it inside a clear box, and lock it with a padlock. Everyone can plainly see that the cube is trapped inside and completely out of reach. Now briefly place the closed box out of sight. In the blink of an eye, the impossible happens... The cube inside the locked box visibly transforms and appears completely solved!

No suspicious moves. No access to the cube. Just an incredible visual miracle happening under seemingly impossible conditions.

An extraordinary effect that combines audience participation, impossible conditions, and an impossible ending that is sure to leave a lasting impression.
