

Perfect Score 2.0 by Jon Allen

Do you wish you could do a perfect Mercury Card Fold every time? It's never been so easy to prepare and perform!

Jon Allen's original Perfect Score became one of THE most valuable tools for magicians. With **Perfect Score 2.0** it is even easier and quicker to prepare your cards. Within a couple of seconds, you will prepare a card to fold into quarters or sixths.

You will confidently be able to fold a card perfectly, every single time. **Perfect Score 2.0** helps make the move effortless and way more natural. No more fumbling under the deck.

Perfect Score 2.0 is a single-piece rigid template that helps you quickly and easily prepare cards. Unlike the original that used a scoring tool, this new design allows you to use a push pin, needle, safety pin, blade or other suitable object. You also do not need to rest it on a surface to score your cards.

Whatever Card to Box you perform, **Perfect Score 2.0** will be a valuable tool for you to prepare the cards... especially for those boxes where the 'card' is perfectly folded inside or the actual signed card is a fairly tight fit.

Regardless of your card's back design or any misprinting, **Perfect Score 2.0** will prepare your cards exactly every time.

It will even score your blank cards perfectly into quarters or sixths!

While having a perfectly folded signed card match the 'card' seen in a box is vital, you can use **Perfect Score 2.0** for other routines i.e. any 'folded card revelation', torn & restored card routines and pocket indexes.

Included in the tutorial is Jon's add-a-number prediction routine. The total of several numbers matches the prediction sitting on the table in view the whole time!

Comes with the **Perfect Score 2.0** unit, push pin, and bag.
