

## Electricks Spirit Series Echo (Peek/Reveal)

Three matching blackboards. One seamless system. Clean miracles.

In modern mentalism, the real challenge isn't getting information - it's revealing it cleanly, naturally, and without suspicion.

The Electricks Spirit Series was created to solve that exact problem.

Not with a single clever prop. But with a complete, unified slate system where capture, reveal, and clean ending all happen using identical-looking blackboards. No mismatched props. No awkward transitions. No "why did the board change?" moments.

Just pure theatre.

### What Makes Spirit Different

Most electronic boards do one thing well. Spirit was designed to do everything - and still end clean.

The Spirit Series consists of three visually identical A4 blackboards, each with a specific role:

- **Spirit Pad** - captures writing or drawings naturally
- **Spirit Echo** - reveals them instantly, in real time
- **Spirit Plain** - ungimmicked twin for switches, handouts, and clean endings

They can be used independently - or together as a single, flowing system. Everything looks familiar. Everything feels fair. Nothing else works like this. Everything looks natural.

### Spirit Echo - Real-time peek and reveal board

At the heart of the system is Spirit Echo - a lightning-fast electronic blackboard hiding advanced display technology behind an ordinary chalk surface.

#### Use it to reveal:

- drawings
- words and names
- numbers
- times and clocks
- playing cards
- symbols, games, or predictions

## Key strengths:

- Instant refresh with performance-level speed
- TrueWrite™ text rendering and TrueSketch™ drawing engine
- Picture-in-picture peeking via the PeekSmith app (coming later with a firmware update)
- Direct integration with Atom, Quantum, PeekSmith 3, MrCard, and later with Bond
- Real chalk surface for natural endings
- Silent, reliable, built for real performance conditions

## Spirit Echo

becomes the central reveal screen for your entire show.
