

## PITATA Photo Prediction - Bühnentrick

Bridging the Gap Between Digital Magic and Physical Reality

PITATA Photo Prediction

"They say a picture is worth a thousand words. It freezes a fleeting second into eternity, rendering a moment undeniable."

In the world of mentalism, we have mastered the art of predicting the future with words and numbers. But text can be abstract. We crave something more visceral, an experience of absolute reality that is as undeniable as a physical photograph.

Today, PITATA is proud to present the next evolution in visual mentalism: The PITATA Photo Prediction. As always, enjoy the trailer!

### THE EFFECT

Your spectator names any piece of information - a specific time, a distant place, a loved one's name, or a playing card. You simply type it into your notes to 'confirm' and 'lock in' their choice.

You then reach into your pocket and remove a sealed envelope. Inside is a photograph, seemingly taken prior. The image perfectly matches their thought. It is no longer just a prediction; it is a moment frozen in time.

### THE TECHNOLOGY

At its core, the PITATA Photo Prediction is a cutting-edge, ultra-compact Bluetooth color printer utilizing ZINK (Zero Ink) technology.

- Compact-Sized Printer: Designed specifically for performers, at only 84x117x19mm, it fits in the jacket pocket for easy portability.
- Small But Visible: Printed picture is small enough to be palmed or hidden inside a wallet but large enough to be seen.
- High Fidelity: Produces stunning 3-inch photos rapidly, ensuring your performance never loses its rhythm.
- ZINK (Zero Ink) Technology: Prints stunning 3-in photos rapidly without the need for ink cartridges or ribbons. Color is embedded directly in the special paper and activated by heat during printing (similar to thermal printing), making the device reliable during performance and mess-free.
- Easily Available Photo Paper: Replacement ZINK photo paper can be easily purchased from the PITATA Website.

## THE PITATA OS: Limitless Templates

We built our operating system from the ground up to ensure the most realistic "handwriting" and "images" possible. Our custom templates include:

- AI Handwriting Conversion: Convert any digital text or finger-writing into realistic handwriting on a blackboard, a whiteboard, or a notebook page. You can even generate and use your own handwriting style.
- Time & Clocks: Whether they name a digital or analog time, the system generates a photograph of a wristwatch, wall clock, or digital display in seconds.
- Multi-Prediction: Why stop at one? Predict a poker player's hand and the time on their watch in a single photograph.
- Google Image Integration: Type any word, and the system automatically fetches the first result from Google Images and prints it instantly.
- Custom Template Editor: Upload your own backgrounds and add text, cards, or clock elements for a truly unique routine.

## THE PITATA IoT Ecosystem

The Photo Prediction doesn't just work with your phone; it joins the most advanced magic ecosystem in the world. The PITATA Photo Prediction works together with:

- PITATA Impression Pads: Using AI recognition, anything written on our pads can automatically trigger the printer for a completely hands-off performance.
- PITATA Palm Remote: For the most covert input method, use our new Bluetooth remote to trigger prints without ever touching your phone.

## PITATA NEW APP

The PITATA Photo Prediction App is now officially available on the Apple App Store and Google Play. You will notice that the "PITATA Photo Prediction App" is a paid App (It requires you to pay a high price to prevent unauthorized use). Please email us at [pitatamagic@gmail.com](mailto:pitatamagic@gmail.com) to obtain the App for FREE.

- Built from the Ground Up: We engineered the PITATA Photo Prediction App from scratch, specifically tailored for the professional performer's needs.
- Intuitive UI & Logic: We designed the app to be easy to use. Featuring an intuitive design and easy operation logic, ensuring a smooth performance.
- Supports Custom Templates: You can easily create your own custom templates, giving you endless creative freedom to surprise your audience and expand your routines.
- Endless Improvement: We are constantly adding new designs and official templates to the library, continuously to keep your magic fresh.

## THE ULTIMATE SOUVENIR

When the performance ends, the "frozen moment" becomes the ultimate gift.

The photograph is tangible proof of a miracle - a permanent seal of wonder that rests in the audience's hands and memories forever.

From digital magic to tangible reality. This is PITATA's answer to the future.

- Light, compact, easy to carry.
- Printer Size: 84x117x19mm
