

PITATA Infinite Tag - Bühnentrick

The PITATA Infinite Tag represents the ultimate evolution in electronic magic. Designed to make high-tech magic completely invisible, this device allows for seamless, organic, and incredibly powerful predictions that leave your audience speechless.

The Most Natural Prediction Device

The Infinite Tag is designed to look and feel like a standard plastic luggage tag. By moving the battery, Bluetooth, and bulky electronic components into a separate "Host" unit, we have achieved a tag that is a mere 5mm thick.

The Host unit powers and refreshes the E-ink Tag via NFC in seconds, ensuring the tag itself remains lightweight and completely indistinguishable from a normal object.

Key Features & Effects

- Barcode Prediction: A breakthrough in electronic magic. Predict text, numbers, or playing cards as a scannable barcode. The tag is the perfect, natural carrier for this effect.
- Any Drawing: Instantly sync hand-drawn sketches from your phone or choose from a pre-set gallery to appear on the tag's display.
- Any Text & Numbers: Input any information into the PITATA Pro App and see it appear in seconds. Use various fonts, including a custom Handwriting Font, for a deeply personal touch.
- Playing Cards & Digital Clock: Display a hand-drawn playing card or a digital time input via a dial or calculator.
- Dry-Erase Surface: The tag's surface is compatible with dry-erase markers, allowing it to function as a high-tech mini whiteboard during your routine.

Seamless Ecosystem Integration

The PITATA Infinite Tag is fully integrated into the PITATA IoT ecosystem, offering even more performance combinations:

- PITATA Impression Pad*: Anything written on the pad is automatically recognized and transmitted to the tag.
- PITATA Palm Remote*: Use our remote for the most covert, tactile, and effortless input method available.
- PITATA Pro App: Access dozens of features and frequent updates driven by real-world user feedback.

*Sold separately

Why Choose the Infinite Tag?

The "Split" design allows you to hide the Host unit in your pocket, wallet, or even a card box, making detection impossible. Whether you are a professional mentalist or a dedicated hobbyist, the PITATA Infinite Tag provides a natural, high-performance tool for the modern world.
