

Ambitious Leap (Blue) by Anthony Vasquez

Imagine this...

A spectator freely selects and signs any card. The signed card keeps rising to the top of the deck, just as everyone expects from a great Ambitious Card routine. But just when they think it's over... the real ending begins.

The signed card visually penetrates the card box right before the spectators' eyes. An unexpected, impossible moment that delivers the perfect ending to one of the most iconic card routines ever created.

Ambitious Leap is designed to give your Ambitious Card routine the ending no one sees coming. It's visual, practical, and integrates seamlessly into your existing routine without forcing you to change the structure you've already perfected.
