

Dream Keeper Journal by Daniel K

Dream Keeper Journal

is Daniel K's professional version of one of the most powerful effects in mentalism: **CONFABULATION**.

This is what Daniel K says about Dream Keeper:

"I've been performing the classic Confabulation for several years, but I always felt something was missing, I wanted a version that felt organic, practical, and natural for real-world performances.

With Dream Keeper, everything makes sense, I truly believe that the way this routine is designed changes everything! And all you need to perform this miracle is contained inside a beautiful leather Journal."

Designed to feel completely organic, **Dream Keeper Journal** transforms the classic Confabulation plot into a personal experience that audiences instantly connect with.

Everything needed to perform this miracle is self-contained within a beautiful leather dream journal, creating a presentation that feels natural, personal, and fully justified from beginning to end.

Just an elegant leather journal, a dream, and an impossible prediction.

THE EFFECT

The performer explains that he keeps a journal beside his bed to write down his dreams when he wakes up.

The audience is then invited to collectively create a new imaginary dream. Every decision is freely imagined and written down.

The mentalist explains that, before any of these choices were made, a dream had already been written and sealed inside an envelope in the journal.

When the dream is revealed, every detail matches the choices made by the spectators with impossible precision.

Features

- Daniel K's professional Confabulation routine.
- Beautiful handcrafted leather dream journal.
- Completely self-contained.
- Organic and engaging presentation.
- Practical for real-world performance.
- A powerful reputation-making effect.
- No electronics.

A dream written before the show predicts a reality created moments ago.
