

Yuci Tiny Wizard Black by TCC - Pokerdeck

A deck perfectly suited for magicians, thoughtfully designed in every detail with their needs in mind.

For example, the center of the tuck box features a Joker along with all 13 values, while the four corners display outlines of the four suits.

This creates an open-ended prediction system-you can mark it according to your needs, allowing you to predict any card you choose.

Beneath the Joker, the phrase "*I know your cards*" is printed, serving as a line that can be incorporated into prediction routines.

The two special cards are designed to create the effect of transforming a folded paper card from an illustration into a real object-custom-made specifically for this deck.

Available in both black and white editions: the black version is more formal and refined, while the white version feels fresh and elegant.
