

Predestination by Gary Jones

A self working fooler!

Gary Jones is a real world worker. One of the busiest working magicians in the UK.

This is a fooler, even for some magicians, its self working and gets great reactions!

Here's what happens:

You remove some picture cards from a deck of cards. You show a joker and explain that something is written on the back and place it to one side.

You hold two picture cards at a time and let the spectator choose one each time. You ask them write down which one they choose. Its a genuine free choice no magicians choice.

After they chosen each time and they have written down the FOUR free choices, you turn over the joker to reveal that you knew all along what choices they would make!

Totally self working, learn in minutes, ready to go and includes everything you need.
