

Morpho V2 (Sapphire) by TCC Fashion - Pokerdeck

Butterflies stand as nature's most elegant marvels. Emerging silently from dormant chrysalises, they unfurl their wings the moment metamorphosis completes, embracing the boundless freedom of the sky.

Their fleeting yet radiant lives make every wingbeat precious. Delicate and dainty as they are, they possess unyielding resilience: enduring confinement, finishing transformation, and soaring toward the light. This journey from slumber to bloom bestows upon butterflies their timeless symbolism: freedom, metamorphosis and rebirth.

Morpho V2 Sapphire

- Die-cut window & Cold foil tuck
- Cold foil card backsUnique dark blue base pattern

The Sapphire Deck

is inspired by the Blue pansy. Its wings display a vivid, translucent blue, dotted with scattered black and orange spots, while the edges are outlined with subtle black-and-white contours, creating a striking and dynamic contrast.

A special dark blue base pattern is added, settling inward; its delicate layers quietly emerge in the interplay of light and shadow, inviting closer contemplation.

When light falls on the surface of the cards, the layers of cold foil and the base pattern interplay, and the blue subtly shifts with the viewing angle.

It is as if the butterfly gently flutters its wings in stillness, and the rhythm of light and color quietly unfolds.
